Sector: Mining

According to the World Bank, demand for critical minerals is set to surge up to 500% by 2050.

Source: Department of Mineral & Petroleum Resources - RSA

China currently controls over **70%** of global mineral processing.

In response, countries are turning inward by securing their own resources and trading mainly with trusted allies.

South Africa has a chance to lead.

By working with other African nations, we can build regional processing hubs and keep more value on the continent.
